Security Capability Statement

About Us

Established in 2005, SoftSages Technology is a certified Minority Woman-Owned Business Enterprise (MWBE) headquartered in the United States, with a global footprint extending across the United Kingdom, Canada, and India. We specialize in delivering high-impact solutions in IT Staffing, Software Development, Cybersecurity, and IoT Development. Over the past two decades, we have built a distinguished portfolio serving both government agencies and private sector enterprises.

Our core strategy centers on operational excellence and client satisfaction. By leveraging the deep technical expertise of our dedicated global team, we deliver tailor-made solutions designed to meet the unique challenges of our partners.

Identity & Access Management

Our IAM solutions enhance security while simultaneously boosting employee productivity and operational efficiency using best-in-class industry products

- Secure access via simplified Single Sign-On (SSO) and robust multi-factor authentication (MFA)
- Automate Access Management with Orchestration and Identity Governance (IGA)
- Protect the most critical assets using Privileged Access Management (PAM)

Software & Hardware Security Assessment

Our security assessment services provide a comprehensive "stress test" for your business, identifying and resolving hardware flaws and software vulnerabilities before they can be exploited

- Conduct tests to simulate real-world scenarios to uncover & fix vulnerabilities
- Mitigate Phishing risks through employee awareness and testing
- Secure critical hardware assets - network firewalls, servers, VPNs, databases etc
- Detect and stop malicious attacks in real-time to protect reputation & revenue

Compliance & Security Controls Preparedness

We prepare your business to navigate complex regulatory standards and requirements, ranging from financial and healthcare sectors to strict government defense contracts

- PCI-DSS, HIPAA, PHI, NIST 800-171/DFARS
- Be "audit-ready" by closing security control gaps for highly regulated industries
- Proactive Risk Management using Continuous Compliance

Data Security

We protect your company's most valuable data through a combination of encryption best practices, secure database management, and internal safeguards against accidental leaks

- Execute standards-based encryption for data in-transit, at rest, and in-use
- Mitigate Ransomware attacks with defense-in-depth and smart backups/restores
- Deploy Data Loss Prevention (DLP) to prevent insider threats, malicious attacks

Cloud Security

We secure your cloud infrastructure (AWS, Google, Azure) by eliminating misconfigurations and excessive permissions that lead to data breaches and unexpected costs

- Deploy Cloud Security Posture Management (CSPM) to continuously monitor and remediate misconfigurations
- Protect modern applications - Serverless, Containers & Kubernetes
- Execute security best practices using IAM, Encryption, Logging & Monitoring, Threat & Vulnerability Management, SIEM via policies and automation

AI Security

As AI becomes a cornerstone of business, we provide the critical guardrails needed to innovate without risking your intellectual property or trade secrets

- Protect your IP from leaking into public AI models using input/output guardrails
- Deter "prompt injection" and other AI specific threats and attacks
- Monitor AI workloads and verify open-source assets using Supply Chain trust
- Secure advanced AI patterns - RAG (Retrieval Augmentation Generation) and Agentic Frameworks

Security Capability Statement

Differentiators

Future-Proof Security
- Continuously evolving solutions to mitigate emerging threats
- Security that adapts to new technologies allows you to innovate

AI-Powered Threat Intelligence
- Leverage AI to stop threats before they impact your business
- Real-time risk detection & proactive protection

Custom-Tailored & Risk-Driven Solutions
- Security approach designed specifically for your business
- Focuses on your unique risks for current and future needs

Business Continuity
- Security monitoring for agile business availability
- Continuous business operations during adverse attacks

Unmatched Compliance
- Automated compliance processes & audit-readiness
- Ensures meeting & exceeding regulatory requirements

24/7 Battle-Tested Security Experts
- Leverage tools & insights to monitor & respond to threats
- Certifications and credentials to resolve real world issues
